overview

Welcome to the "Drift Life" mobile application (app) to use with your camera.
There are two unique functions of the app:
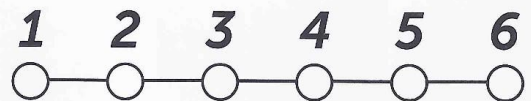

Online live broadcasting
6 steps to live broadcast.

Wi-Fi Direct
Connect your phone to the camera via Wi-Fi to easily control your camera.

---

online live broadcasting

There are only 6 steps for live broadcasting:

1 2 3 4 5 6

Register / Login
   Choose your camera
      Choose a network
         QR code mode/standard Mode
           Waiting for connection
              Ready to broadcast

Step 1
register/login

To use the live broadcasting function please login first. If you are a new user,
please register first.

REGISTER

* Login also supports Facebook & Google+ login.

Step 2
choose a camera

1. Touch the '+' icon on the front page of the app. Then choose 'Begin Broadcast'.

2. Choose a camera model from the list.

Choose camera

X1

Compass

Step 3
choose a network

There are two ways to access a network connection available for the camera to use:

Via a 4G hotspot from your mobile phone
Use your mobile phone's 4G hotsport to broadcast. This option does use mobile data and is not available to iOS users due to technical limitations of the iPhone.
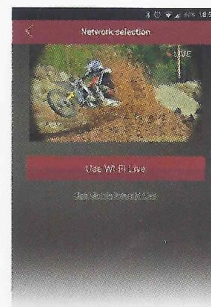

Via Wi-Fi
Use the Wi-Fi networks available nearby to broadcast. This does not use mobile data.

Step 3.1
broadcast via a 4G hotspot from your mobile phone

Choose 'Use mobile data' on this page:

*iOS users can only use Wi-Fi to broadcast due to technical limitations of the iPhone.

Step 3.2
broadcast via Wi-Fi

Type in your Wi-Fi SSID and password, and make sure that there are no special characters in the SSID.

Step 4
QR code mode

Select Standard Mode when prompted and wait for the camera to connect to the Wi-Fi after selecting 'Continue'.

Step 4.1
standard Mode

Select Standard Mode when prompted and wait for the camera to connect to the Wi-Fi after selecting 'Continue'.

Step 5
# waiting for connection

The camera is connecting to the Wi-Fi

ready to broadcast

When you have successfully scanned the QR code, the app will automatically jump to the Broadcast preparation page. After a few seconds, the preview broadcast stream will be displayed.

Now add information including a description and cover photo. Then press 'Go Live' to start broadcasting.

wi-fi direct mode

The camera has a Wi-Fi direct function where you can connect your phone to the camera by connecting the phone to the camera's Wi-Fi.

1. Choose a camera from the "⬚" menu found on the top right of the app page.

2. Turn on the camera's Wi-Fi via the notice on the app screen;

3. Connect your phone to the camera's Wi-Fi SSID network;

4. Go back to the app, choose the function you want.

*Different camera models have different default passwords. The Compass has the default password a '1234567890'.
